

MONTHLY UPDATE

HAPPY MAY EVERYONE!

Hey everyone, It has been a full month since our new website has launched and I can definitely say we love it! On top of that, so many great things have been going on for our company. We recently launched our new virtual estimating system (Stream) and it is going to make our customers lives SO much easier. Instead of waiting months on other electricians calendars, Stream allows for us to virtually talk with our customers and quickly get a quote back to them. It's amazing and we can not wait to hear the reviews!

This month we also had some huge anniversaries and I think it is important to highlight all those that have stayed with RME throughout the years. We are so grateful for all of our employees and all the hard work they put in every single day. Go team! Well, that's all for now. Check out the rest of our update to see all the amazing projects we have going on here in Idaho and in Utah! Don't forget to leave us a review on Google & BBB if you've had a great experience working with us!

NOW OFFERING: VIRTUAL ESTIMATING

VIRTUAL ESTIMATING WITH STREAM
"Stream helps companies connect with their customers more meaningfully – reducing waste and inefficiencies and making knowledge and information more accessible to all. Our tools help support, visualize, and maintain our home and world." With Stream, RME will be able to cut down on driving time to respond quicker to customers needs. RME will be able to virtually make estimates for smaller projects to create quicker turn around for our customers.

WHAT THIS MEANS FOR CUSTOMER
Do you have a hot tub installation that you need help with but don't want to wait months for an electrician to be able to come out just to only give you a quote? With Stream, RME will be able to talk to customers through video to see the layout of the project, save the video, and make an estimate in a quicker turnaround time. It's as easy as picking an available time, receiving a call link, and virtually showing our estimators your projects.
